

GROUND^ED AI™ IN THE EQUIPMENT MANUFACTURING

Grounded AI™ Solutions:

Pluto**shift**'s GROUNDED AI™ platform is helping Equipment Manufacturing with the following business solutions:

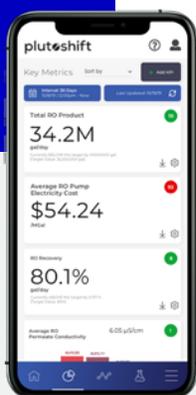

- Automate UF membrane design to increase sales productivity and conversion.
- Tailor customer-specific dashboards to centralize performance insights.
- Detect anomalies to predict maintenance requirements.
- Optimize resources and equipment by using predictive analytics.
- Simulate annual operational cost by project.

In a recent report, **76%** said they need solutions that analyze data in real time."

- Pluto**shift** survey of 500 mid-level manufacturing professionals

Common Pain Points:

- Inability to accurately predict resource needs across client locations.
- Inability to track and communicate equipment performance and service delivery.
- Inefficient and error-prone data collection to design projects.
- Lack of predictive digital tools to optimize process improvements.

Who We Are:

Pluto**shift** is the leader in operational intelligence for industrial processes. Our cloud-based solution, GROUNDED AI™, can track and predict key performance metrics within any industrial workflow.
