

# GROUND**E**D AI™ IN THE OIL & GAS INDUSTRY

## Grounded AI™ Solutions:

Pluto**shift**'s GROUND**E**D AI™ platform is currently helping Oil & Gas companies with the following business solutions:

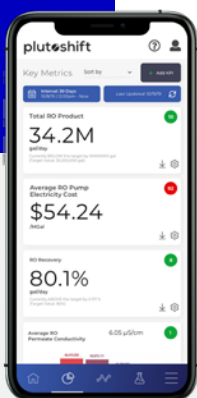

- Manage unique conditions at remote facilities with a single intelligence platform.
- Predict equipment maintenance needs and faults with field crew alerts.
- Improve mobile water treatment units with more effective chemical dosing.
- Optimize midstream water multi-asset systems for improved operational performance and asset life.
- Optimize MUD systems for supply chain and drilling cost reductions.

In a recent report, **76%** said they need solutions that analyze data in real time."

- Pluto**shift** survey of 500 mid-level manufacturing professionals

## Common Pain Points:

- Injection well pump performance
- Mobile water treatment process improvement
- Mud system efficiency
- Midstream water system management
- Field crew productivity

## Who We Are:

Pluto**shift** is the leader in operational intelligence for industrial processes.

Our cloud-based solution, GROUND**E**D AI™, can track and predict key performance metrics within any industrial workflow.
