

GROUND**E**D AI™ IN THE UTILITIES INDUSTRY

Grounded AI™ Solutions:

Pluto**shift**'s GROUND**E**D AI™ platform is helping the Utilities Industry with the following business solutions:

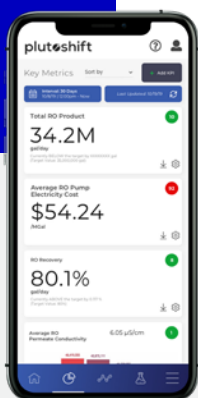

- Use predictive analytics for/on asset parameters and financial impact.
- Optimize energy efficiency through process improvements.
- Predict required resources and alleviate costly asset downtime.
- Find root causes through correlation patterns to drive immediate action.
- Optimize operational and maintenance costs through fleet management.

In a recent report, **76%** said they need solutions that analyze data in real time."

- Pluto**shift** survey of 500 mid-level manufacturing professionals

Common Pain Points:

- Increasing demands to reduce total energy and water cost.
- Dealing with aging infrastructure.
- Escalating costs to meet compliance and sustainability goals.
- Inefficient resource use and unnecessary downtime.
- Lack of predictive digital tools to optimize process changes and drive efficiencies.

Who We Are:

Pluto**shift** is the leader in operational intelligence for industrial processes.

Our cloud-based solution, GROUND**E**D AI™, can track and predict key performance metrics within any industrial workflow.
